

THE SEVEN PATHWAYS

Each one is the home of a state technical standard, and each is somewhere you could spend a term going deep. You do not have to pick the one you are best at.

STANDARD S8

Industrial Design

How a thing looks, feels in the hand, and can actually be made.

MR. FRANK

STANDARD S10

Architecture & Civil

Buildings, sites, and the loads that hold them up.

MR. FRANK

STANDARD S7

Mechanical

Forces, motion, materials, and whether the part survives.

MR. FRANK

STANDARD S5

Electrical

Circuits, power, and measuring what you cannot see.

MR. DRYER

STANDARD S6

Software

Logic, code, and making a machine decide something.

MR. DRYER

STANDARD S9

Automation & Robotics

Where the mechanical, the electrical and the code have to work as one system.

MR. FRANK AND MR. DRYER

STANDARD S4

Project Management

Making a project finish on time, with the parts you actually ordered.

MR. FRANK AND MR. DRYER
