

BHR ENG - Daily LOGBOOK

PROJECT ENGINEER:

DATE: [Insert Date]

PROJECT(s): [List all active projects]

TOOLS & SOFTWARE UTILIZED: [Specify hardware and software assets employed]

ENGINEERING DESIGN PROCESS (EDP) STATUS CODES

Utilize the following status codes to categorize the current phase of engineering activity.

[PI] Problem Identification / Research | [DD] Detailed Design (CAD/Modeling) | [FAB] Fabrication & Development | [TE] Testing & Evaluation | [IR] Improve & Redesign

INTERVAL 1: Prior to Break EDP STATUS CODE: PI ▾

WORK HIGHLIGHTS & OBSERVATIONS - Track tasks completed: consultations, reviews, anomalies, etc.

- [Bullet Point 1]
- [Bullet Point 2]

INTERVAL ROADBLOCKS - Document specific technical failures and propose work arounds.

[Type here...]

VISUAL EVIDENCE - Caption and describe your images.

[Attach CAD renderings, logic diagrams, or photographic documentation of work done]

INTERVAL 2: Break to Lunch EDP STATUS CODE: DD ▾

WORK HIGHLIGHTS & OBSERVATIONS - Track tasks completed: consultations, reviews, anomalies, etc.

- [Bullet Point 1]
- [Bullet Point 2]

INTERVAL ROADBLOCKS - Document specific technical failures and propose work arounds.

[Type here...]

VISUAL EVIDENCE - Caption and describe your images.

[Attach CAD renderings, logic diagrams, or photographic documentation of work done]

INTERVAL 3: Lunch to End of Day & Daily Wrap-up EDP STATUS CODE:

PI ▾

CHALLENGES & TROUBLESHOOTING - Summarize technical failures and the proposed work arounds from today.

[Type here...]

DAILY SYNTHESIS - Provide a technical summary of your day analyzing decisions and evaluating progress on goals.

[Type reflection here...]

NEXT CLASS'S AGENDA - State immediate engineering objectives for the subsequent session.

[Type here...]
