

# Project Rubric

Every project is graded on these five. The points are what Classroom uses; the words are what they mean.

|                               | Excellent                                                                                                                                                                           | Good                                                                                                                                                   | Fair                                                                                                                                                                | Unsatisfactory                                                                                                                                   | Poor                                                          |
|-------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------|
| <b>Concept</b>                | 20 pts<br>Shows a clear grasp of the concepts behind this project and applies them without help. Can explain why the design is the way it is.                                       | 18 pts<br>Shows a solid grasp of the concepts. Needed minimal help. Can explain most of the design decisions.                                          | 16 pts<br>Shows some grasp of the concepts. Needed help to complete the work. Can explain some of the decisions.                                                    | 12 pts<br>Shows little grasp of the concepts. Needed substantial help throughout the assignment.                                                 | 7 pts<br>Did not show an understanding of the concepts.       |
| <b>Background Knowledge</b>   | 20 pts<br>Applies previously learned skills and material with little or no reteaching.                                                                                              | 18 pts<br>Applies previously learned material with minimal reinforcement.                                                                              | 16 pts<br>Applies some previously learned material. Some reteaching was needed.                                                                                     | 12 pts<br>Very little previously learned material carried over. Consistent reinforcement was needed.                                             | 7 pts<br>Did not show previously learned material.            |
| <b>Technical Knowledge</b>    | 20 pts<br>All of the requested requirements are met. The work is accurate to a high standard.                                                                                       | 18 pts<br>All of the requested requirements are met. Few or no inaccuracies.                                                                           | 16 pts<br>Most of the requested requirements are met. Some inaccuracies.                                                                                            | 12 pts<br>Some of the requested requirements are met. Many inaccuracies.                                                                         | 7 pts<br>Did not provide the requested requirements.          |
| <b>Participation/Teamwork</b> | 20 pts<br>Work is done on time. On task throughout. A strong contributor to the design team.                                                                                        | 18 pts<br>Work is done on time. On task most of the time. Works well in the design team.                                                               | 16 pts<br>Inefficient use of time delayed completion. On task some of the time; sometimes distracts others. Works okay in the team.                                 | 12 pts<br>Poor use of time prevented completion. Off task; often distracts others. Does not work well in the team.                               | 7 pts<br>Did not participate or work in a team.               |
| <b>Presentation</b>           | 20 pts<br>Graphics are professional. Technical drawings include all of the specifications and requirements. Documentation is complete and dated. The project is visually appealing. | 18 pts<br>Graphics are neat. Technical drawings include most of the specifications and requirements. Documentation is complete. Visually satisfactory. | 16 pts<br>Graphics are somewhat neat. Drawings include some of the specifications and requirements. Documentation has gaps. Needs work to be visually satisfactory. | 12 pts<br>Graphics are difficult to read. Drawings are inconsistent and miss many of the specifications and requirements. Documentation is thin. | 7 pts<br>Did not create work that communicates what was done. |

Five criteria, twenty points each, one hundred in all. “Requirements” means the ones in the brief for this project – read it again before you hand in.
