

TWO HALVES OF ONE PROGRAM

Everything in this shop sits on one of two axes. Both instructors teach all four years — go to whoever fits the problem in front of you.

EDF

Engineering Design & Fabrication

MR. FRANK

Turning an idea into a thing that exists, and making it hold up.

- Designing in CAD so it works and looks right
- Getting a part ready to print or cut
- Structures that carry load
- Drawings someone else could build from
- Fixing a prototype that came out wrong

ESEC

Engineering Systems & Emerging Concepts

MR. DRYER

The invisible half — the code and the circuits that make it decide something.

- Designing or troubleshooting a circuit
- Writing and debugging code for a board or robot
- Working out why a system misbehaves
- Getting sensors and motors working together
- Proving with data that it does what you claim
