

EMERGENCY

School nurse

ext. 2230

Report all injuries. Every one, however small.

Chemical in the eyes

Wash the eye under an open flow of water for FIFTEEN MINUTES before going for treatment. Have someone else fetch help while you stay at the water.

Never try to remove a foreign object from an eye or from the body. Water only.

Know these before you need them

- Where the first aid kit is.
- Where the eyewash is.
- Where the fire extinguisher is.
- Where the nearest instructor is.
- Never work alone with power tools. Two people, both able to see each other.
